

## Mission & Vision statement KS 2021/2022

The board of KIVI students (KS) will carry out its tasks in line with the three core values of KIVI;

- Network
- Visibility
- Knowledge (hard and soft skills)

In all its events, lectures, workshops, etc., KS will strive for a performance in which one or more of the above core values are propagated to help technical students from higher and scientific education in the Netherlands to excel during their studies in order to give students a head start in their career.

### KS structure

KS consists of technical students from higher and scientific education who study within the Netherlands. The aim is to appoint 1 representative from each technical educational institution in order to form a board that is representative of technical higher and scientific education in the Netherlands. The board can thus grow to approximately 38 people. Each delegate must formulate his/her own mission that he/she is willing to commit to and start his/her own committee for this or form a committee together with others from the board to achieve this mission.

In addition, KS makes it possible to set up local sections per educational institution, as soon as the students of the local educational institution express a need for this and can find at least 3 students for it in the roles of: chairman, secretary and treasurer. These local sections fall under the KS umbrella and therefore have a strong cooperative relationship with KS. The local sections are therefore also included in the KS budget. To this end, they submit an annual budget in the first week of October, so that the treasurer of KS can include it in the budget of the entire umbrella organization and make payments for the following year.

*Current state of local sections:*

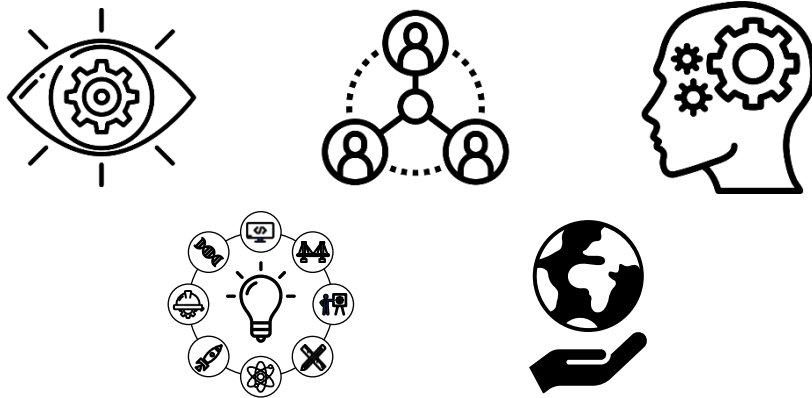

- KIVI students Twente (KST)

## Mission & Vision statement KS 2021/2022

### Mission 2021/2022

The 1st KIVI student board has formulated its intention to commit itself to the following matters:

- increase the visibility of KIVI/KS among the target group (technical students in higher and scientific education);
- expanding the board to one representative per Dutch technical university and university of applied sciences;
- help students to set up startups;
- connecting different studies and educational institutions to strengthen/enlarge multidisciplinary work;
- supporting students in their subjects in the form of further training/database;
- supporting students in finding internships;
- collaborating with study associations of higher and scientific education;
- cooperate with (young) political parties to be able to respond to social issues from a technological point of view.

### Vision 2021/2022

#### *Network*

Expanding our network by collaborating and organizing events with people in the industry, education and government and by recruiting students for the board of technical universities and colleges in the Netherlands.

Current status: 3 uni, 1 hbo, 1 company, 3 active members, 1 political party

Goal: to expand the board with 1 board member from the University of Twente and 1 from Eindhoven University of Technology, and two board members from a applied university.

**0/4**

#### *Social project*

One of the goals of KIVI is to collect and bundle the knowledge of all engineers, to use it to solve social issues and to advise government agencies with policy and standards.

Project name: Engineer the Future: circular wind farm (Committee Engineer the Future)

Completion Date: July/September 2022

#### *Stunt*

To create extra visibility for KS, KS wants to get into the picture by performing a crazy stunt and thereby attracting media attention. The aim is to enter the World Guinness Book of Records with this and to immortalize the stunt of KS in that database.

Stunt Name: Record Attempt: Largest K'NEX Structure in the World (K'NEXgineer Committee)

#### *Platform*

KS wants to support students with their hard skills by setting up a platform where students can ask their questions and where teachers and other students try to answer them in the best possible way. This should also be a place where exams are collected. KIVI is currently rolling out a platform that can be set up for this, the KIVI community, KS has already secured a separate place here, the 'KIVI Students' community. The aim is to set this up in the course of this year and to set a good start for the board 2022/2023. (Education Committee)

#### *Internships*

Internships are an increasingly important part of the educational curriculum. KS wants to help KIVI by further adding to the internship database to help students find an internship. (Education Committee)

## Mission & Vision statement KS 2021/2022

Goal: to expand the internship platform with 50 internships through the network of the board.

**0/50**

### *Events*

In order to move the network of students from local to national, KS wants to fulfill the three core values of KIVI in all its events. During these events it is the intention to always provide technical content with a connecting and cheerful note. (Committee events)

Event proposals:

- William Keij (presentation studying/working abroad)
- lecture "What if..."
- award ceremony for social project Engineer the Future 2022: circular wind farms
- lectures supporting social project and stunt
- stunt reveal; world record or not?
- hackathon for start-ups (arising from projects)

### **Recommendation 2021/2022**

Recommendation of the board is:

- provided that the board expands by 3 members; an award ceremony for the most socially relevant bachelor's final project (KIVI student award committee?)
